$$E = MC^2$$

**Envision = Management Command & Control**

**Need an Einstein  
to energize your  
organization?**

**Not with Envision!**

**Envision energizes** Business Process Management, Enterprise Architecture, Strategic Planning, Risk Analysis, Requirements Management, Systems Architecture, and any other Information or Knowledge Management need.

**See Why Leading analysts and consultants choose Envision...**

◆ **Intuitive User Interface**

You don't need to be an Einstein to see the big picture! Tired of shuffling endless reports, documents, diagrams, graphs and spreadsheets looking for the right information?

**Envision is Smart!** Existing graphics, documents, spreadsheets and DB tables can be literally dragged & dropped into **Envision** giving you with an intuitive view of your enterprise.

◆ **Adaptable**

Create your own custom enterprise models and link them seamlessly together. Changing needs and new insights can be easily incorporated into **Envision** at any time.

◆ **Leverage Your Knowledge**

**Envision's** repository leverages all types of information and knowledge, allowing extensive analysis without any programming.

**Envision** offers an unlimited number of views and perspectives of an enterprise. Its *object oriented* repository organizes knowledge and eliminates inconsistencies in various stakeholder views.

◆ **Powerful Reporting Options**

**Envision** organizes complex business knowledge & systems in a visual, easy to understand manner. Consistent data makes it easier to track business goals/objectives against existing business practices and procedures. Users can easily link to outside applications [E.g. project management tools, spreadsheets, and databases.] **Envision** offers several new and unique tools for analyzing and reporting on your business.

◆ **True Multi-user Support**

**Envision** supports workgroup environments, yet maintains the integrity of the repository information at all times. No merging of files or manual comparing of data is required. **Envision** handles it all seamlessly.

◆ **Dynamic Linking**

Encapsulate all your development and office productivity tools under a common interface. Users can double click on any object in an **Envision** model and invoke an outside application even automatically exporting repository data if desired.

**Energize Your Enterprise with Envision**

**Envision = MC<sup>2</sup>**

**Your Enterprise at Your Fingertips!**
